

## **Awarded Design**

***The internal coating machine HIL-94 has been awarded with the Design Award Silver at the International Design Award Baden-Württemberg, Focus Open 2015.***

„Focus Open“ is the international award of the federal state Baden-Württemberg for remarkable and innovative designs. Since 1999, the „Focus“ is awarded annually by the Design Center Stuttgart. This year`s award ceremony took place in the Scale in Ludwigsburg on the 16<sup>th</sup> of October 2016. A jury of six-members selected in a two-day jury session from more than 200 applications the award winners of this year.

The awarded machine design of the HIL-94 was developed by the industrial designer Knut Braake in close cooperation with Sprimag. The design of the internal coating machine for aerosol cans is characterized by a homogeneous, clear line concept, which further continuous in the following internal coating dryer. The large glass doors enable excellent access and generous insight into the coating process. Due to the variable and movable control unit, a high, ergonomic operating comfort is achieved. Across all machine types, the contrasting design element of the doors shows the function of the system with an abstract spray jet.
